# FEATURES

- ◆ This stunning frame has a commercial grade telescoping crank system. As the Nova cranks down, the top portion of the mast rises, allowing you to completely close the umbrella without having to move any furniture placed underneath.
- ◆ The 4" diameter aluminum center pole with four internal strength channels, combined with the extruded aluminum ribs provide exceptional support and strength.
- ◆ For easier installation of an umbrella this large, the Nova mounts to a hinged spigot. This allows for the umbrella mast to be placed onto the spigot while the unit is on its side, prior to raising it to an upright position.
- ◆ Reinforced grommets paired with an ultra-durable woven nylon wrap prevent the chance of fabric tearing from the frame.
- ◆ Engineered to withstand 50-60 MPH sustained winds.
- ◆ Maintenance free stainless steel hardware.

From top to bottom, the Nova is exceptionally designed to shade your guests in style while being virtually maintenance free. The long-life winding handle, and telescopic crank mechanism open and close easily above furniture. Corrosion free parts and a water repellent canopy are matched with a robust wind rating.

Manufactured with beautiful 9 oz. marine grade acrylic fabric that offers unmatched UV protection and longevity, is mold and mildew resistant, and has a guarantee against fading. Other umbrellas are manufactured with lighter, 8 oz. furniture/cushion grade fabric that can sag or stretch over time. Join multiple umbrellas together with an optional, removable gutter system.

Umbrellas comparable to the Nova in size and weight almost always require a permanent installation. The Nova is one of the only large shade structures in the industry with a semi-permanent and non-permanent mount available. This umbrella not only looks spectacular, but can be mounted on any surface for multiple commercial applications.
